PROFESSIONAL SUMMARY

MERN Stack Developer with 3.5 years of experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, TypeScript, and REST APIs. Experienced in developing responsive frontends, backend services, authentication, real-time applications, and API integrations. Strong understanding of Git, Agile development, and modern JavaScript. Currently expanding cloud skills with AWS and seeking international software engineering opportunities.

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript
Web Technologies:	HTML5, CSS, Bootstrap 5, Material-UI, Tailwind CSS
Frameworks & Libs:	React, Vite, Express.js, Node.js, Redux
Databases:	MongoDB, MySQL
Cloud & DevOps:	AWS (EC2, S3, IAM - <i>Currently Learning</i>)
Tools & Utilities:	Git, VS Code, Postman

WORK EXPERIENCE

Jireh Software Solutions (Bengaluru) Dec 2024 – Present

ArtSmiley – Multi-Portal Art Selling, Auction and Exhibition Platform

Role: Frontend Developer

- Developed frontend using React and managed global state with Redux.
- Integrated REST APIs for artwork listing, bidding (auction), and exhibition participation.
- Worked across multiple portals, each with tailored UI and functionality.
- Enabled users to buy, sell, and exhibit artwork through an interactive platform.
- Achieved 85% unit test coverage using React Testing Library, significantly enhancing application reliability and maintainability.

Teciex Solutions (Bangalore) Nov 2022 – Nov 2024

Tripleoo – Hotel & Café Booking Web App with Social Features

Role: Full Stack Web Developer

- Designed and developed frontend using React and Bootstrap CSS.
- Created and integrated backend APIs using Node.js and Express.
- Enabled users to book hotels, browse café services, and engage with social features (like, share, upload).
- Implemented real-time chat functionality using Socket.IO.

Janani Hospital – Digital Patient Management System

Role: Full Stack Developer

- Designed and developed frontend using React and Bootstrap CSS.
- Created and integrated backend APIs using Node.js and Express.
- Implemented canvas-based digital signature capture for patient consent and verification.
- Used MongoDB to store and retrieve patient and appointment data.

EDUCATION

Master of Computer Applications (MCA) Sep 2019 – Aug 2022

R. V. College of Engineering (Bengaluru)

KEY RESPONSIBILITIES

- Designed and developed dynamic and responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Vite, Node.js).
- Integrated front-end and back-end components for a seamless user experience.
- Developed and implemented RESTful APIs to manage CRUD operations efficiently.
